

Aura and Harmony Infrastructure Program

 **CLIENT**
McConnell Dowell

 **LOCATION**
Sunshine Coast, QLD

 **NUMBER OF MODULES**
48

 **INSTALL TIMEFRAME**
9 days (main compound)

On behalf of client Unitywater, McConnell Dowell are delivering critical new water and wastewater infrastructure to support population growth on Queensland's Sunshine Coast. With that, comes full temporary site setup needs for multiple teams on the ground delivering the long-term project.

Ausco Modular's 360° Solutions offer ensures not only smart spaces, but the fixtures and fittings needed for immediate functionality. Ausco's Brisbane team worked with McConnell Dowell to ensure multiple project sites were operational as per the client's construction schedule.

Building ECO Upgrades ensure RCLG compliance for temporary site accommodation, and upgraded office and lunchroom furniture allows staff to perform and recharge in comfort. Additional products and services such as waste tanks with high level alarms and pump out service, plus generators, and delivery and installation by Ausco means the McConnell Dowell teams can focus on their project at hand.

- Building ECO Upgrades for RCLG compliance
- Office and lunchroom spaces with upgraded furniture options
- Ablution blocks
- Fully furnished First Aid room
- Pre-start/training room space
- Waste tanks with high level alarms and pump out service
- Water tanks
- Generators
- Stairs, landings and handrails
- Building tiedowns
- Delivery and installation, plus eventual site/s demobilisation
